This presentation includes non-GAAP measures. Our non-GAAP measures are not meant to be considered in isolation or as a substitute for the corresponding U.S. GAAP measures and should be read only in conjunction with our consolidated financial statements prepared in accordance with U.S. GAAP. For a detailed explanation of the adjustments made to the corresponding U.S. GAAP measures, see Notes to Financial Schedules.

LAZARD, Inc.

- (a) Selected Summary Financial Information are non-GAAP measures. Lazard believes that presenting results and measures on an adjusted basis in conjunction with U.S. GAAP measures provides a meaningful and useful basis for comparison of its operating results across periods. Beginning in the first quarter of 2024, Lazard has updated the names of certain non-GAAP measures and metrics. The nomenclature change did not result in any change to the components of our non-GAAP measures and metrics compared to prior periods.
- (b) A non-GAAP measure which represents adjusted compensation and benefits expense as a percentage of adjusted net revenue.
- (c) A non-GAAP measure which represents adjusted non-compensation expenses as a percentage of adjusted net revenue.
- (d) A non-GAAP measure which represents adjusted operating income as a percentage of adjusted net revenue.
- (e) A non-GAAP measure which includes units of the long-term incentive compensation program consisting of profits interest participation rights, which are equity incentive awards that, subject to certain conditions, may be exchanged for shares of our common stock. Certain profits interest participation rights may be excluded from the computation of outstanding stock equivalents for U.S. GAAP net income per share. In addition, this measure includes the dilutive effect of the weighted average number of shares of common stock issuable from share-based compensation programs. However, for the six month period ended June 30, 2023, this measure excluded such shares as the effect would have been anti-dilutive.
